Contract Savings Trend

Procurement Process Savings

JAGUAR\spfunctional variances provides a process savings, such as the use of pre-negotiated contracts. This Procurement Process Savings shows the total amount of savings. Procurement Process Savings shows the difference between actual price and benchmark price, and gives the total amount of savings. Procurement Process Savings can be used to see if the Procurement Process is working and if savings are being made.

Procurement Process Savings can be used to see if the Procurement Process is working and if savings are being made. Procurement Process Savings can be used to see if the Procurement Process is working and if savings are being made.

Objectives Reduce Cost spend by Procurement professionals. Use Value Consumption as KPI for the end of Procurement Process. Use Value Consumption as KPI for the end of Procurement Process. Use Value Consumption as KPI for the end of Procurement Process. Use Contract Lifecycle Management to increase contract savings. Use Pay-to-Use to increase Pay-for-Performance spend.

Average Requisition Approval Time

JAGUAR\spfunctional variances provides a process for requisition approval. This process is to track timely receipt of requisition approval. Average Requisition Approval Time shows the average time for requisition approval. Average Requisition Approval Time can be used to see if the requisition approval process is working and if requisitions are being initiated and filled per organization goals.

Objectives Increase Pay-for-Performance spend. Use Contract Lifecycle Management to automate renewals. Use Contract Lifecycle Management to increase contract visibility. Use Contract Lifecycle Management to increase contract savings. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend.

Sourcing Savings Opportunity

Organizations can increase their sourcing savings by using Pay-to-Use to increase savings through sourcing activities. Pay-to-Use provides a sourcing savings opportunity. Sourcing savings opportunity shows the difference between actual price and benchmark price and gives the total amount of savings. Sourcing savings opportunity can be used to see if the sourcing activities are being performed and if savings are being made.

Objectives Use Pay-to-Use to increase recommended prices.

Recommended Increase % Value Is a suggested amount of spend for your organization to accept contract.

Estimated Sourcing Cost Savings Computational binding into Recommended Increase % Value. Estimated Sourcing Savings shows the difference between actual price and benchmark price and gives the total amount of savings. Estimated Sourcing Savings can be used to see if the sourcing activities are being performed and if savings are being made.

JAGUAR\invoicing

Invoice Process Savings

JAGUAR\invoicing variances can eliminate paper invoices and provide a straight touch less invoice processing and configure tolerances and workflows rules. This report is an overview to track or capture and process invoices. Invoice Process Savings shows the difference between actual price and benchmark price and gives the total amount of savings. Invoice Process Savings can be used to see if the invoicing activities are being performed and if savings are being made.

Objectives Increase Invoice Process Savings. Increase process savings to increase of the number of invoices processed. Increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend.

Invoice Process Savings Invoice process savings shows the difference between actual price and benchmark price and gives the total amount of savings. Invoice Process Savings can be used to see if the invoicing activities are being performed and if savings are being made.

Invoice Process Savings Trend Invoice process savings trend shows the trend over time, which can be used to see if the invoicing activities are being performed and if savings are being made.

Potential Early Payment Discount Savings

Customers and Suppliers can negotiate for a discount if the invoice is paid within a certain period of time. Potential Early Payment Discount Savings shows the difference between actual price and benchmark price and gives the total amount of savings. Potential Early Payment Discount Savings can be used to see if the invoicing activities are being performed and if savings are being made.

Objectives Capture Early Payment Discounts. Work negotiated agreements contact early payment terms. The Supplier Portal can be used to capture Early Payment Discounts. Use Contract Lifecycle Management to increase contract visibility. Use Contract Lifecycle Management to increase contract savings. Use Contract Lifecycle Management to automate renewals. Use Contract Lifecycle Management to increase compliance to pre-negotiated contracts. Use Pay-to-Use to increase Pay-for-Performance spend.

Touch Invoices

Touch invoices are invoices that are processed without human intervention. Touch invoices are processed through a workflow and automatically posted and paid. Touch invoices are an indicator of how much of the invoicing process is automated. Touch invoices are a key indicator of how much of the invoicing process is automated. Pay-to-Use Platform Automation Service can be used to increase Touch Invoices. Pay-to-Use Platform Automation Service can be used to increase Touch Invoices. Pay-to-Use Platform Automation Service can be used to increase Touch Invoices. Pay-to-Use Platform Automation Service can be used to increase Touch Invoices.

Objectives Increase the number of Pay-Touch Invoices. The ability to extract and suggest discounts to increase Pay-Touch Invoices. Use Pay-to-Use to increase Pay-for-Performance spend.

Non-Touch Invoices Detail

Fiscal Year	Total Invoices	Non-Touch Invoices
2016	1,000,000	500,000
2017	1,000,000	500,000
2018	1,000,000	500,000

Average Invoice Approval Time

JAGUAR\invoicing variances provides a process for invoice approval. This process is to track timely receipt of invoice approval. Average Invoice Approval Time shows the average time for invoice approval. Average Invoice Approval Time can be used to see if the invoice approval process is working and if invoices are being approved per organization goals.

Objectives Reduce Invoice Approval Time. Reducing invoice approval time increases the organization's ability to take advantage of early payment discounts.

Monetary Group. Provide the Objectives of the Number of Approvals and the Average Invoice Value of Approval Days for Pay-Performance to process invoices & to pay the Average Invoice Value.

Automated Invoice Capture

JAGUAR\invoicing invoicing variances provides a process for invoice capture. Automated Invoice Capture provides a process for capture. These Automated Invoice Capture variances provides a process for capture and process of invoices. Automated Invoice Capture shows the difference between actual price and benchmark price and gives the total amount of savings. Automated Invoice Capture can be used to see if the invoicing activities are being performed and if savings are being made.

Objectives Increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend.

Invoice Automated Capture Invoice Automated Capture shows the difference between actual price and benchmark price and gives the total amount of savings. Invoice Automated Capture can be used to see if the invoicing activities are being performed and if savings are being made.

Invoice Automated Capture Trend Invoice automated capture trend shows the trend over time, which can be used to see if the invoicing activities are being performed and if savings are being made.

Objectives Increase Pay-Touch Invoices. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend. Use Pay-to-Use to increase Pay-for-Performance spend.

Invoices by Capture Source (Last 12 Mos)

Invoice Source	Fiscal Year Invoices Received	Automated Invoices Received	Manual Invoices Received	Electronic Invoices Received	Supplier Portal Invoices Received
